

Evacuation

If you are ordered to EVACUATE:

Do not take risks.

Follow the instructions of the person in charge of the visit and the Port Authority staff.

Stop what you are doing if it is not essential for the evacuation.

Do not go back to pick up personal belongings.

Leave the area in an orderly manner, following the established evacuation routes.

Do not use the elevator during an emergency.

If you suspect that someone is trapped in the affected area, notify evacuation personnel immediately.

If you see clouds of gases or smoke, stay away from them, fleeing in a crosswind direction.

In the presence of heavy smoke, walk in a low position and cover your nose and mouth with a damp cloth.

If your clothes are burning, roll on the ground. Do not run.

Do not use your vehicle unless specifically instructed to do so.

When leaving the affected area, proceed to the **meeting point** indicated and wait for orders.

At the assembly point, check if a colleague is missing and notify the Emergency Teams if necessary.

Never leave the meeting point without informing the person in charge of the evacuation.

Meeting Point

- Evacuation of a Port Authority Building: Established in the Building's Emergency Action Plan.
- Evacuation of an AREA or SECTOR of the PORT. According to the following table:

Area	Meeting Point Alternative Meeting Point

EMERGENCY PLAN Port Authority of Vigo

Emergency Manual

Visits in the port area

Rev. 8.Sep. 2022 (ENG)

Definitions

Port of Vigo Self-Protection Plan

The P.A.U. contemplates the measures established by the Port Authority to ensure the coordination of the actions to be carried out by the entities involved to control emergencies that may arise in the Port Service Area.

P.A.U. activation phases.

0.	CONATO
1.	GREEN
2.	BLUE
3.	RED

Emergency

An emergency is defined as any event, such as a leak or spill, fire or explosion, resulting from an uncontrolled development of the activity and which poses a serious immediate or delayed risk to people, property and the environment.

Port Control Center (P.C.C.)

Port Authority Center from which all emergency control operations established in the P.A.U. are coordinated, guaranteeing its operation 24 hours a day, 365 days a year.

Emergency and Incident Notification

If you detect an emergency situation or incident, regardless of whether other emergency services have been notified:

- ✓ **Alert personnel in the area**
- ✓ **Notify the Port Control Center of the emergency.**

**Port Control Center P.C.C.
900 100 802**

Report on:

- **Personal identification and contact phone number**
- **Location of the emergency**
- **Type of emergency: fire, spill...**
- **Nature, magnitude and evolution of the emergency**
- **Existence of injured and apparent condition**
- **Possible chemical products involved**
- **Control actions taken so far**
- **Any other information requested by the E.C.C. Operator.**

DO NOT CUT COMMUNICATION UNTIL INSTRUCTED TO DO SO BY THE P.C.C. OPERATOR.

Guidelines for action in port areas

In normal situation:

- ✓ If accessing by vehicle, respect the traffic regulations and park in the authorized and authorized areas.
- ✓ Heavy machinery and vehicles working on the dock have the right of way.
- ✓ Wear high-visibility clothing while on the docks, in work areas, in the stockpile of goods, on roads...
- ✓ Walking near the edge of the docks should be done with caution due to the risk of falling into the sea.
- ✓ While inside the port area, the personal identification provided must be worn visibly.
- ✓ Access to the loading, unloading, stowage and unstowage areas is strictly forbidden.
- ✓ Access to the interior of the concessions must be authorized by each facility.
- ✓ The indications of the Port Police shall be followed at all times.

If you are involved in an emergency:

- ✓ Do not take any risks and follow the instructions of the intervention personnel.
- ✓ If you suspect that someone is trapped in the emergency area, notify emergency personnel immediately.
- ✓ In case of fire:
 - In small fires use a portable fire extinguisher.
 - Avoid air renewal in the affected area.
 - Ensure an escape route at all times.
 - Avoid inhaling fumes.
